

IBN-E-SINA RESEARCH AND DEVELOPMENT ORGANIZATION HERAT INTERNATIONAL INVESTMENT CONFERENCE

Herat, Afghanistan | Three days | Dates to be confirmed

Invitation to become a sponsor

Connect your organisation with international science, investment and opportunity in Afghanistan.

Dear Prospective Partner,

The Ibn-e-Sina Research and Development Organization (ISRAND) invites your organisation to support the **Herat International Investment Conference**, a planned three-day event bringing together approximately **400 participants**, including international investors, scientists, technical specialists, media representatives and Afghan project owners.

ISRAND has signed MoUs with Afghan ministries and has received official government permission and support for the conference. Building on this institutional foundation, we aim to connect promising opportunities with relevant expertise, informed discussion and practical next steps.

Why partner with this conference

- **A credible institutional foundation.** ISRAND's ministry cooperation and official government support provide a strong basis for convening international and Afghan stakeholders.
- **Access to a relevant international audience.** Position your organisation among investors, businesses, scientists and professional networks with an interest in Afghanistan's development.
- **Networks that extend beyond the event.** ISRAND connects contacts in Afghanistan with networks in Germany, the United States and the wider Afghan diaspora, supporting introductions and continued engagement.
- **Science connected with investment.** Planned technical contributions and reviewed project summaries will help participants discuss opportunities, identify information gaps and assess the next steps.
- **Visible support for women's participation.** Help enable active contributions from women entrepreneurs and health professionals, including preparation of a concept for a midwifery school.
- **Defined recognition for your contribution.** Choose a package with clear visibility, delegate participation and acknowledgement benefits, supported by evidence of delivery.
- **A focus on follow-through.** The conference plan includes documented investor discussions and structured follow-up after 30, 60 and 90 days.

Your support will contribute to the **EUR 80,000 conference programme** covering preparation, international outreach, media activities, delivery and follow-up. Sponsorship options are presented on the following page.

ISRAND support for investors

ISRAND can help coordinate discussions with relevant ministries and institutions and maintain project follow-up. Research, preliminary assessments and feasibility-study support may also be arranged under separate agreements. These opportunities are available to investors **independently of sponsorship level**; meetings remain subject to confirmation by the parties concerned.
